EDUCATION

ISLAMIA UNIVERSITY,
BAHAWALPUR, PAKISTAN

Bachelor of Science in Computer
Science 2020- 2024

SKILLS

FRONTEND

- HTML
- CSS
- JavaScript
- ReactJS
- VueJS
- NextJS
- Tailwind CSS
- Bootstrap

BACKEND

- NestJS
- NodeJS
- RESTful APIs,
- CRM Integrations
- Laravel
- PHP

DATABASE

- MYSQL
- PostgreSql

ABOUT ME

Driven and detail-oriented Software Developer experienced in building modern web applications. Proficient in JavaScript and PHP with hands-on experience in **Next.js**, **Node.js**, **NestJS**, and **Laravel**. Skilled in **PostgreSQL**, API development, **Payload CMS**, and CRM integrations to create scalable and efficient solutions. Passionate about learning new technologies and contributing to collaborative, agile development teams.

WORK EXPERIENCE

Junior DEVELOPER

Next Codify (Nov 2024- Dec 2025)

As a Senior Developer at NextCodify, I led to full-stack web development using **Node.js** and **NestJS** for backend services and React for interactive frontends. I designed scalable **RESTful APIs**, authentication systems, CRM integrations, responsive user interfaces, and database management with **PostgreSQL**. I also develop modern **React components** while following best practices in code quality, Git version control, and team collaboration, helping deliver scalable and efficient client solutions in a dynamic team environment.

FRONTEND WEB DEVELOPER

Zindex (May 2023 - September 2024)

As a Senior Developer at NextCodify, I contribute to full-stack web projects using **Laravel** for **backend development** and **Vue.js** for interactive frontends. I help implement **RESTful APIs**, **authentication**, responsive UIs, database migrations with Eloquent, and Vue 3 components while following best practices in code quality, Git, and team collaboration. This role builds my practical skills in **PHP**, **JavaScript**, and delivering scalable client solutions in a dynamic small-team setting.

Full Stack Developer

Hibit Technologies(January 2026- Present)

Designed and built a dynamic personal landing page and portfolio using **Node.js (NestJS)**, **React**, **PostgreSQL**, and **Payload CMS**. The project highlights client services, skills, a project gallery, and contact features, with dynamic content managed through Payload CMS and APIs—enabling seamless updates to project listings, service offerings, and inquiry storage via database integration. Leveraged Payload's built-in admin panel to give non-technical stakeholders easy control over portfolio content while maintaining a clean, headless architecture. This strengthened my full-stack development skills in responsive design, backend API development, and database management, while delivering a professional online presence for the organization.

PROJECTS

TOOLS

- Git/GitHub
- ChromeDevTools
- Figma
- Postman
- Vercel
- Neon PostgreSQL
- FileZilla
- Docker
- GitLab

HEADLESS CMS

- Payload CMS

API SKILLS

- RESTful API Development
- GraphQL API Development
- Authentication & Authorization (JWT, OAuth, Laravel Sanctum, Strapi roles)
- Database Integration (MongoDB, MySQL, PostgreSQL with Node.js)
- Third-Party API Integration (Payment, Email, SMS APIs)

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Time Management
- Communication Skills
- Quick Learner

CERTIFICATION

- **WEB DEVELOPMENT**
Jan 2020 - June 2021
ACE Connect
- **META FRONTEND DEVELOPER**
June 2022 - Dec 2023
Acc Connect
- **PHP PROGRAMMING**
June 2021 - Dec 2022
Aptech

RESTO APP (RESTAURANT MANAGEMENT APP)

Developed a restaurant web application using **Next.js** and **PostgreSQL**, implementing features such as menu display, order management, and dynamic data handling. The application was built with modern frontend techniques to ensure fast performance and a responsive user interface. **PostgreSQL** database integration was used to efficiently manage menu items and customer orders.

FOOD DELIVERY APP - LARAVEL, VUE.JS

Developed a food delivery web application using **Laravel** and **Vue.js**. The application includes features such as restaurant listings, food menu browsing, and order placement. **Vue.js** was used to create a dynamic and responsive user interface, while **Laravel** handled backend logic and **API development**. The system allows efficient management of orders, users, and restaurant data.

University Management System - Payload CMS

Built a multi-tenant university management platform using **NestJS**, **React**, **PostgreSQL**, and **Payload CMS** to handle student records, faculty data, course enrollments, and academic workflows. Implemented role-based access control via Payload's authentication and custom endpoints. Migrated from Strapi to Payload for better TypeScript support and content modeling flexibility. Deployed on **Vercel** with **Neon PostgreSQL** for serverless, scalable database management.

BLOG WEBSITE - LARAVEL, SANCTUM

Developed a blog platform using **Laravel** with **Sanctum** for authentication. Users can register, log in, and perform full CRUD operations on posts, with role-based access control for authors and admins. Features responsive design with efficient database handling for posts and user data.

CRM INTEGRATION & LEAD MANAGEMENT API

Built a **CRM Lead Management API** using **NestJS** and **PostgreSQL** with **JWT authentication**, role-based access control, and third-party CRM integrations. Developed **RESTful** endpoints for lead management, automated email notifications, and ensured secure, validated database transactions, delivering a scalable solution for tracking and managing customer leads.
